### **A little information about this beautiful product**

Di van Niekerk, teacher and author of several embroidery books, has launched her own dazzling range of hand painted pure silk and organza ribbons. There are more than 120 beautiful, natural colours to choose from and as the need arises, new colours are introduced. These ribbons are ideal for Ribbon Embroidery - turn your work into a masterpiece. The ribbons are variegated and designed for authentic, life-like flowers and leaves. They are colourfast and washable. Painted by an embroiderer for embroiderers!

*As our ribbons are all hand painted and not dyed, the colour is stronger along the edge of the ribbon. This is what results in such a natural finish. The different shades blend beautifully with each other, allowing the colours to merge so well with each other that the completed embroidery is almost real!*
